KingRoot is an app that allows you to eradicate an Android device in seconds, as long as the operating system is between Android 4.2.2 and Android 5.1. This means that you can achieve the same result as if you were using a classic Towelroot. Except that you can use it even if you have a lollipop. The rooting procedure is as simple as with Towelroot. Although the app is entirely in Chinese, you just have to press the blue button and wait. After a couple of seconds, the app completes the process and your device is rooted. It's important to know that KingRoot doesn't work with all devices. With Moto G, for example, you can cut some problems. With the Nexus, however, it usually works perfectly. KingRoot is a great way to eradicate your Android. However, rooting the device is always a delicate process, so treading is easy and be aware of the risks.
